Material Safety Data Sheet

Form: 333
Issue Date: 10/31/02
Supersedes: 05/23/00
MSDS Number: Z02700

Section 1 - PRODUCT AND COMPANY IDENTIFICATION

Manufacturer /Importer: Zeon Chemicals L.P.
4111 Bells Lane
Louisville, Kentucky 40211

Telephone Number: 1-800-735-3388
(502)-775-2000

Chemical Family: n-Amyl Acetate C7H14O2

Emergency Telephone Number: 1-800-776-2460 Ext 7650
(502) 774-8126

Uses: Electronic Applications

This MSDS applies to the following product(s):

ZED-N50

Section 2 - COMPOSITION / INFORMATION ON INGREDIENTS

TWA = Time Weighted Average  
TLV = Threshold Limit Value  
AL = Action Level  
RD = Respirable Dust  
TD = Total Dust  
STEL = Short Term Exposure Limit  
Skin = Skin contact may be a significant route of exposure  
A2 = ACGIH Suspected Human Carcinogen  
A3 = ACGIH Animal Carcinogen  
A4 = ACGIH Not Classifiable as a Human Carcinogen  
PNOC = Particulates Not Otherwise Classified  
NIC = Notice of Intended Change

ZED-N50

Page 1
Section 3 - HAZARDS IDENTIFICATION

| Emergency Overview: | This material is a clear, colorless thin liquid with a characteristic banana oil odor. Flammable liquid and vapors. Harmful if inhaled, ingested, or absorbed through skin. May produce vapors or mists that can cause eye, skin, and respiratory tract irritation. Prolonged or repeated exposure to vapors may cause drowsiness, nausea, dizziness, or headaches. Toxic combustion products may be released under fire conditions. |

Potential Health Effects from Overexposure: Possible routes of entry include skin & eye contact and process vapor or mist inhalation.

Contact with liquid, vapors, or mists may cause irritation to the eyes, skin, nose, throat, and respiratory tract. Inhalation of high vapor or mist concentrations may produce narcotic effects, CNS depression, and unconsciousness. Accidental ingestion may cause gastrointestinal irritation with nausea, vomiting, and diarrhea. Repeated or prolonged overexposure may cause dermatitis in some individuals and possible damage to liver and kidneys. Processing under conditions of inadequate ventilation may produce symptoms of nausea, dizziness, tearing, coughing, or headaches. Typically these effects are reversible upon removal from exposure and no lasting effects are expected. Most importantly, the potential for irritation will depend on the effectiveness of exhaust ventilation provided to the process area.

Appropriate precautions should be taken to minimize potential exposure to accidental ingestion, inhalation of process vapors or mists, and skin contact.

Overexposure to decomposition or combustion products may cause irritation of the eyes, skin, and respiratory tract. Symptoms such as coughing, tearing, and irritation should be regarded as potentially hazardous and measures taken to avoid exposure. See Section 10 for information on combustion products.

Section 4 - FIRST AID MEASURES

If irritation occurs or persists from any route of exposure, remove the affected individual from the area and seek medical assistance.

**Ingestion:** If swallowed, induce vomiting as directed by medical personnel. Give large quantities of water. Never give anything by mouth to an unconscious person. Seek medical assistance immediately.

**Eye Contact:** Flush eyes with running water for several minutes while holding eyelids open. Consult a physician if irritation persists.

**Skin Contact:** Remove contaminated clothing. Wash skin with soap and water. Seek medical attention if irritation / allergic skin reaction develops. Launder contaminated clothing before reuse.

**Vapor Inhalation** (processing vapors or decomposition products): Remove the affected individual to fresh air and seek medical assistance immediately.

Section 5 - FIRE FIGHTING MEASURES

**Extinguishing Media:** Carbon dioxide, dry chemical, water fog or alcohol resistant foam is recommended for small fires. For large fires use aqueous foam or water fog. Use water spray or fog to cool fire exposed containers.

**Special Firefighting Procedures:** Wear positive pressure self-contained breathing apparatus (SCBA) during the attack phase of firefighting operations and during cleanup in enclosed or poorly ventilated areas immediately after a fire. Personnel not having suitable respiratory protection must leave the area to prevent significant exposure to toxic combustion gases from any source.

**Unusual Fire and Explosion Hazards:** Flammable liquid and vapors. Vapor can flow along surfaces to distant ignition sources and flash back. Closed containers may rupture due to pressure buildup under fire conditions. Toxic gases may be formed upon combustion and represents a hazard to firefighters. See Section 10 for additional information on combustion products.
Section 6 - ACCIDENTAL RELEASE MEASURES

Wear respiratory protection and protective clothing, ventilate area, remove all ignition sources, and use non-sparking tools and equipment to contain spill and recover as much as possible. Absorb remaining residue with inert material and place into closed containers to await disposal. Wash spill area with soap and water. Do not allow product to enter municipal sewers or waterways. Spills or releases to the environment may be reportable to the National Response Center (800) 424-8802 and to state and/or local agencies. The CERCLA RQ for α-Amyl Acetate is 5000 pounds.

Section 7 - HANDLING AND STORAGE

Use only in well ventilated areas. Avoid contact with eyes, skin, and clothing. Store in a well ventilated location away from heat, sparks, flame, and direct sunlight. Keep container closed when not in use. Do not eat, smoke, or drink where the product is handled, processed, or stored. Wash hands thoroughly before eating or smoking. Evaluate transfer operations for potential static charge buildup and ground and bond accordingly. Use non-sparking tools and equipment. Empty containers may retain product residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose empty containers to heat, sparks, open flames, or incompatible materials.

Section 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

Ventilation: Enclose operations and/or provide local exhaust ventilation to draw fumes, vapors, or mists away from workers. Ventilation must be adequate to maintain the ambient workplace atmosphere below the limits listed in Section 2.

Respiratory Protection: For protection against process vapors or mists, wear a NIOSH approved respirator suitable for the anticipated airborne concentration. Wear a positive pressure air-supplied respirator in situations where there may be potential for elevated airborne exposure.

Protective Equipment: During processing operations, splash proof goggles or safety glasses with face shield suitable for keeping liquid material out of the eyes should be worn when potential exists for eye contact. Rubber gloves and apron should be worn when skin contact is anticipated. Provide an eye wash facility and safety shower.

Section 9 - PHYSICAL AND CHEMICAL PROPERTIES

Specific Gravity (H₂O=1): 0.8766  Solubility in Water: 0.18 g/100 ml  % Volatile by Weight: 100
Flash Point: 77° F (25° C)  Vapor Pressure: 4 mm Hg @ 20° C  Vapor Density: 4.5
Boiling Point: 300° F (149° C)  Evaporation Rate: >1  Autoignition Temp: 714° F (378° C)
Lower Explosion Limit: 1.1  Upper Explosion Limit: 7.5

Appearance and Odor: Clear, colorless thin liquid with a characteristic banana oil odor.

Section 10 - STABILITY AND REACTIVITY

Stability: Stable  Hazardous Polymerization: Will not occur

Conditions to Avoid: Overheating, open flames, sparks, and contact with ignition sources.

Materials to Avoid: Oxidizing agents and strong bases.

Hazardous Decomposition Products: Fumes produced when heated to decomposition temperatures may contain carbon monoxide and carbon dioxide. Combustion products must be considered toxic.
Section 11 - TOXICOLOGICAL INFORMATION

The following information was obtained from RTECS:
- Oral LD₅₀ (rat) - 6500 mg/kg
- Oral LD₅₀ (rabbit) - 7400 mg/kg
- Inhalation LCLo (rat) - 5200 ppm
- Eye irritation (human) - 300 ppm
- Inhalation TCLo (human) - 5000 mg/m³/30M

Section 12 - ECOLOGICAL INFORMATION

No information available.

Section 13 - DISPOSAL CONSIDERATIONS

Waste resulting from this product as supplied may be classified as hazardous because of ignitability per the current listings and characteristics contained in 40 CFR Part 261, and its Appendices. It is the generator’s responsibility to determine, per the regulation, the applicability of the Resource Conservation and Recovery Act (RCRA), as well as all state, local, or other governmental agency waste disposal regulations, to the particular waste materials prior to treatment or disposal. Disposal of liquid wastes and solids containing free liquids by land filling is prohibited in most jurisdictions. Incinerate or use biological treatment in accordance with federal, state, and local regulations. Containers of this product may be hazardous when emptied. Empty containers may retain product liquid and vapors.

Section 14 - TRANSPORTATION INFORMATION

For domestic transportation purposes, this product is defined or designated as a hazardous material by the U.S. Department of Transportation under Title 49 of the Code of Federal Regulations.

| DOT Hazard Class | 3 |
| DOT Proper Shipping Name | Amyl Acetates, 3, UN 1104, PG III |
| DOT Label | Class 3 |
| UN/NA Hazard No. | UN 1104 |
| RQ | 5000 pounds |

Section 15 - REGULATORY INFORMATION

TSCA Inventory Status: This product and all components are listed on the U.S. EPA Toxic Substances Control Act Inventory.

TSCA 12(b) Export Notification Status: This product does not contain any components subject to export notification requirements.

SARA 313 Status: This product does not contain any components exceeding the de minimis amount subject to reporting under Section 313 of the Emergency Planning and Community Right-to-Know Act of 1986 and of 40 CFR 372.

It may be possible under certain processing and handling conditions, e.g. processes that create vapors, mists, or dust, to release unreacted monomers and other substances in airborne concentrations in excess of their established exposure limits or guidelines. Customers and processors should do sufficient in-house industrial hygiene monitoring to assure compliance of their operations.

**Reason for (Re)issue: Revise Section 15**

**User’s Responsibility**

This bulletin cannot cover all possible situations which the user may experience during processing. Each aspect of your operation must be examined to determine if, or where, additional precautions may be necessary. All health and safety information contained in this bulletin must be provided to your employees or customers. It is your responsibility to use this information to develop appropriate work practice guidelines and employee instructional programs for your operation.

**Disclaimer of Liability**

As the conditions or methods of use are beyond our control, we do not assume any responsibility and expressly disclaim any liability for any use of this material. Information contained herein is believed to be true and accurate but all statements or suggestions are made without warranty, expressed or implied, regarding accuracy of the information, the hazards connected with the use of the material or the results to be obtained from the use thereof. Compliance with all applicable federal, state, and local laws and regulations remains the responsibility of the user.
